

You will need:

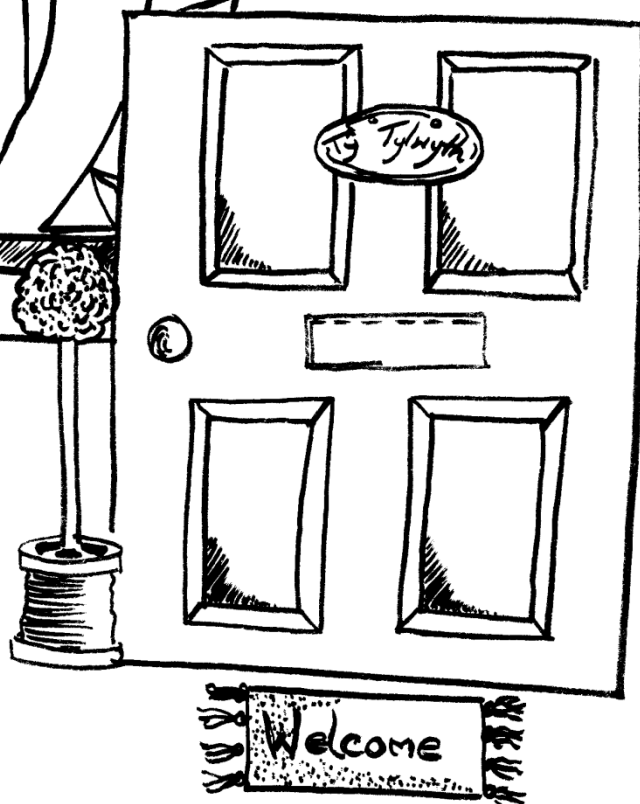

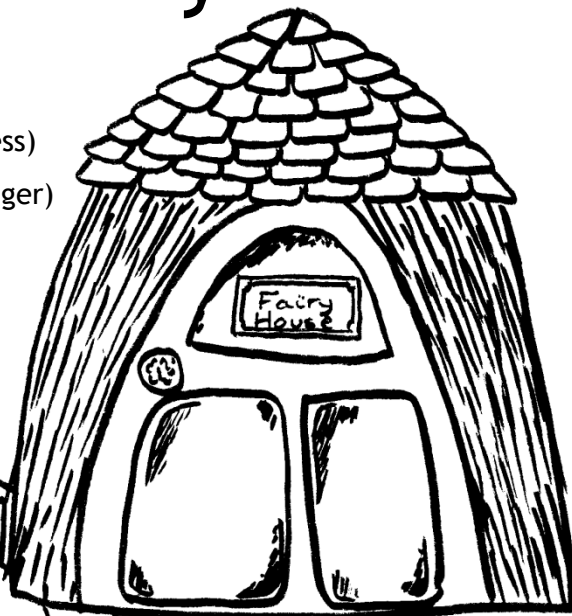

- Small and medium pieces of cardboard (various thickness)
- Glue (White glue or PVA is best for this as it dries stronger)
- Scissors
- *Found items (leaves, petals, seeds, grass, buttons etc)
- *Paint or scraps of coloured paper (to decorate)
- Fine pens for adding details

(* Optional)

1. Draw your door outline onto a piece of card and cut it out using scissors.

2. Use the templates provided to help you or take inspiration from some of the doors here. Remember it's a fairy door so it doesn't need to look like a 'human' door, and wonky angles are very fashionable!

3. Now decorate your door so that it's fit for a fairy King or Queen!

Decorating tips

You could use scraps of card to add dimension and make features like door frames and panels, porches and so on.

Glue on found objects or use paints to give quirky and fun details to your doors. Try leaves for tiles, buttons or acorns as door handles, or tiny windows made from sea glass! Or how about a cotton bobbin tree or fabric scrap doormat? Use biodegradable materials so that your doors will return to the earth safely.

Share the joy!

Hide your fairy doors in your garden or in places where other children can find them.

Remember to take a photo and share @glynnvivian
